- B. Ensure that every single resident of the United States has access to comprehensive, quality healthcare including all primary care, hospital and outpatient services, prescription drugs, dental, vision, audiology, women's reproductive health services, maternity and newborn care, long-term services and supports, mental health and substance abuse treatment, laboratory and diagnostic services, ambulatory services, and more.
- C. Ensure that patients have complete freedom to choose their doctors, hospitals, and other providers without worrying about whether a provider is "in-network."
- D. Ensure that long-term services and supports for persons with disabilities and seniors are fully covered and provided through home and community-based services unless the individual chooses otherwise.
- E. Eliminate hundreds of billions of dollars in inefficient administrative waste.
- F. Prevent healthcare corporations from overcharging for the costs of services and profiting off illness and injury.
- G. Establish global budgets to contain exorbitant costs present in the system today and allow the public to know where our healthcare dollars are being spent.
- H. Bring down the cost of prescription drugs by allowing the Secretary of Health and Human Services to negotiate with pharmaceutical companies for lower prescription drug costs and to provide a compulsory license to a generic manufacturer if the company will not negotiate in good faith.
- I. Preserve the ability for veterans to receive their healthcare through the U.S. Department of Veterans Affairs.
- J. Preserve the ability for American Indians and Native Alaskans to receive their health benefits and services through the Indian Health Service.
